

Company Overview

Hedron Solutions stands at the forefront of cybersecurity engineering and systems innovation. Our mission is to empower government and defense partners with resilient, secure, and adaptive digital infrastructures. With deep expertise across architecture design, risk management, and mission assurance, we deliver end-to-end solutions that strengthen national and organizational security postures.

Security Operations & Compliance

Specializing in Risk Management Framework (RMF) execution and continuous monitoring, Hedron Solutions provides comprehensive cybersecurity analysis and assessment services. Focused on ensuring compliance with critical security standards, this service enables clients to safeguard sensitive information and protect systems against evolving threats.

Cyber Defense & Incident Response

Hedron Solutions provides expert-level services in cybersecurity defense operations, focusing on threat detection, investigation, and mitigation. As a Cyber Defense Analyst, skilled in real-time network monitoring and incident handling, this service ensures that your operations are constantly protected against emerging cyber threats.

DevSecOps & Secure Software Development

Focused on building secure, scalable, and efficient development environments, Hedron Solutions excels in integrating security into every stage of the software development lifecycle. With a strong background in DevSecOps, this service guarantees that applications are deployed securely, minimizing vulnerabilities and reducing the attack surface.

Training & Leadership

With years of leadership and operational experience, Hedron Solutions also offers expert training services designed to enhance your team's cybersecurity capabilities. From tactical training to strategic leadership, this service ensures that personnel are fully equipped to handle modern cybersecurity challenges.

Distinguished Past Performance

- Department of Defense
- United States Navy
- United States Army
- National Geospatial-Intelligence Agency
- Office of Naval Intelligence

Technical Expertise

Cybersecurity & Compliance Tools: Nessus ACAS, eMASS, DISA STIGs, CIS Benchmarks, SCAP

CND / SOC Tools: ArcSight, FireEye, Cisco Firepower, RSA NetWitness, McAfee ePO, Carbon Black, WireShark, HBSS

DevSecOps Tools: Git, Docker, Kubernetes, AWS, vSphere Client

Security Tools: OWASP, Prisma Cloud, SonarQube

Application Security: Secure coding, vulnerability scanning, penetration testing

Clearance Level: Top Secret/SCI

UEI: SJ1TJGH7K5T1

CAGE: 152Q7

NAICS CODE: 541511, 541512, 541519, 541330, 541611, 541614, 541618
